

ART DECORATIVE

SOUND-ABSORBING BOARD

acoustic panel

The development of new products of sound-absorbing board series integrates decoration and sound-absorbing functions, incorporating many personalized cultural and artistic elements. Each style of product is rich and colorful, allowing designers to broaden their minds and freely outline a beautiful picture of interior decoration!

Material and decor

The countless fibers of polyester fibers interweave to form countless small gaps, absorbing sound energy and having good sound absorption effects on both reflected and transmitted waves of sound.

On the premise of fully utilizing the strong sound absorption ability of polyester fibers, nail wooden strips on the polyester fiber board to enhance the three-dimensional sense of the product, which can play a decorative role. Wooden strips come in different styles, including straight and curved shapes. The material of the wooden strip can be MDF (density board) or WPC (wood plastic), and the surface can be coated with technology wood veneer, natural wood veneer, or PVC film. The design is diverse and the texture is different to meet the needs of customers with different aesthetic perspectives.

Square art decorative sound-absorbing board

The sound absorption function of polyester fiber is fully utilized, and WPC wood plastic board is used for hollow carving. WPC carving is nailed and fixed on the polyester fiber board, and the hollow carving can retain the beautiful carving pattern without affecting the sound absorption function of the polyester fiber board. The wood plastic board is decorated with PVC film, which is beautiful and practical, and can form a good three-dimensional beauty through color comparison with polyester fiber. The carving style is aesthetically diverse and can be customized according to different customer preferences, showcasing nobility! Polyester carved sound-absorbing board combines two materials with different functions to achieve a perfect combination of sound absorption and decoration.

Company introduction

About Us

Our company has been established for more than 30 years and is a professional manufacturer of various wood plastic series silent decorative materials. We have advanced production equipment, adopt modern enterprise management systems for operation, and strive to create high-quality brands. The products produced are novel, perfect, and unique, and can be developed into high-grade and high-end new products according to market demand. We adhere to "standardized management and modern technology", regard product quality as the core of all work, and follow the path of brand strategy. Our unremitting pursuit is to strive for progress while maintaining stability and continuous innovation. Our consistent style is based on quality and technology, and customer satisfaction is our greatest wish. We adhere to the business philosophy of "quality first, reputation first, timely supply, and customer first". We warmly welcome new and old customers to discuss cooperation and create brilliance together.
