

HYDROGENIE® Smart Control Valve System

Smarter Water Networks • Lower Costs • Sustainable Operations

■ Why HYDROGENIE®?

Water utilities and councils face increasing challenges in reducing non-revenue water (NRW), maintaining pressure stability, and improving efficiency. HYDROGENIE® provides an intelligent, proven solution to meet these needs.

■■ Key Benefits

- Reduce Leakage & NRW – Detect and minimise real losses
- Optimise Pressure – Stable supply, fewer bursts, longer asset life
- Energy Efficiency – Lower pumping costs and reduced carbon footprint
- Real-Time Monitoring – Continuous insights via SCADA & IIoT
- Proven Internationally – Now available in Australia exclusively through AUST TECH

■■ For Councils & Regional Utilities

- Improve network reliability
- Reduce operating costs
- Deliver better customer service
- Support long-term water sustainability goals
