te pool liner

AUST TECH
ENGINEERING & SUPPLIES PTY LTD

1.-Inner frame of polyester weft
2.- Highly resistant PVC

Remark:

Ideal for residential pools. Manufactured in reinforced PVC-P, this materials is the most useful for lining pools thanks to enhanced malleability, resistance to tearing, ease of welding, resistance to discoloration by UV rays and with a wide range od available colors.

Made-to-measure liners are put together by high frequency welding machines at our facilities. Perfectly adaptable to any pool design or shape, with excellent watertight features, so you can forget about annoying leaks.

- *Ensures total watertightness in odd shaped pools or pools with numerous steps.
- *Highly flexible and adaptable.
- *Smooth and pleasant to touch, it is easy to maintain and durable.
- *Highly resistant to impacts and tearing.
- *PVC does not release dioxins into the atmosphere and can be recycled.
- *Compatible with concrete, prefabricated or steel panel pools. Can also be installed in pools with overflow.
